

Surviving the Downturn and Preparing for the Upturn

Overcoming the Managerial Challenges of 2012

This decade probably promises to be one of the most challenging ever for managers and leaders across all sectors.

But just what exactly are the challenges we face in this decade of austerity?
How do we overcome them?
What new skills and attitudes do we need to survive, prosper and then rebuild?
How do we deliver essential, immediate performance improvements?
How do we 'stand out' in a crowded employment market place?
How do we ensure we have the 'best' managers and leaders in our organisations?
In what ways can we retain, motivate and challenge both them and all employees
What new 'mindsets' must managers and leaders develop?
What challenges will the upturn present when it comes – if you're still downturned too?
What professional support and help is available, particularly from the CMI?
